

Daniher's Drive grew out of an idea to take an annual road trip through regional Australia. It is our chance to thank these communities for their incredible support. All while raising awareness and funds for our ongoing battle against the Beast that is motor neurone disease (MND).

About **FightMND**

Founded in 2014, FightMND was established with the purpose of finding effective treatments and ultimately a cure for MND.

What FightMND has done since 2014 is be the voice, and the guiding star for Australians who want to fight 'the Beast'.

What is **MND**?

The horrible and debilitating disease gradually takes away the patient's use of their arms and legs, their ability to eat and swallow, their speech and ultimately their ability to breathe... all in an average timeframe of just 27 months.

There is no cure. Yet.

FightMND's **impact** so far

- \$85.3 million invested into vital MND research initiatives to find effective treatments or a cure.
- \$14 million invested into care initiatives to improve the lives of people living with MND in Australia.

The goal is a world without MND. A lot has been achieved in 10 years but there's still more to do so we can finally beat the Beast.
